## EXPERIENCE

### Math Online Tutor for Olympiad Students

#### ELFGS

📅 Sep 2018 - Jul 2019

📍 Dushanbe, Tajikistan

- Guided International high school students to prepare for Olympiads, examinations, and college-level coursework by cultivating a deeper understanding of higher-level math concepts both online and offline.

### IT Support

#### Shaw Academy

📅 Sep 2020 - Jun 2021

📍 Tbilisi, Georgia

- Shaw Academy was a global destination for teaching and learning online as Udemy, Coursera, etc.
- My position mainly supported students in a proper understanding of Python Programming Language if they faced any difficulty during the class.
- Answered user inquiries regarding computer software or hardware operations to resolve problems.

### WP Web Developer

#### Cyber Secure Central

📅 Oct 2021 - Apr 2022

📍 Tbilisi, Georgia

- We have been a great team providing companies with amazing and impressive static and dynamic e-commerce websites.

### Intern Full-Stack Web Developing

#### "More" LLC

📅 Sep 2022 - Feb 2023

- Designed and build an Online Food Ordering System based on a small restaurant, and the main goal is to automate the accountant role.
- Developed a full-fledged working implementation beneficial for the small shops.

## PROJECTS

### Blog Website (Content Management System)

html, css, bootstrap, django

- Basic Login, Register functionality & Users can read blogs.
- While the admin can manage posts, users, categories, and comments.

### Online Food Ordering System (Product Management)

django, html, css, bootstrap, js

- Basically, it was for a small dormitory store where the students can see the products and can order anything in their room.
- Admin manages all products dynamically.
